News Week 36

Dear Parents,

Welcome to Earth Week. This week will be spent stressing the importance of caring for our environment. We have various activities planned, including cleaning up our school environment on Friday, April 20th. (wear your old jeans and gym shoes)

Language Arts

We continue to focus on compound words, opposites and writing skills. the children have made fantastic progress with their guided reading. Keep up the great work!

Science

We will have plenty of activities to tie in with Earth Week, including making Earth toast to explain global warming and making a tabletop biosphere.

Concept

During the week we will discuss such things as air and water pollution, recycling and package reduction. We ask that you help us by practicing some of our new “habits” at home. Some tips to remember...REDUCE, REUSE, RECYCLE and help us keep our America beautiful.

Social Studies

West Virginia, Wisconsin and Wyoming will be discussed.

*** Remember: The purpose of Earth Day is to bring a level of awareness to the people of our country for the need to clean up our environment.

Children must be told and shown that they can accomplish wonderful things for our Earth. This is our responsibility as parents and teacher.

We can change and save our world.
