

Two's News

Jan. 27-31 Week 25 Transportation & Groundhog Day

Bits of Intelligence: Musical Instruments

Introductions: numbers 7 & 8

Language Arts: This week will be very exciting in the Language room as we use different modes of transportation to visit places around our town. Bicycles, cars, trains, planes, boats and buses will all help us get around through finger plays and songs. "Down By The Station" and "I've Been Working on The Railroad" are two songs that the children love to sing, so we'll include them in our transportation week as well as our favorite book, Driving My Tractor. The children will also enjoy a ride on the rocking boat.

Craft and Writing: We will keep our class up to their elbows in art and this week is no exception! The children will be making a boat craft this week. Planes, trains and automobiles will also be colored and painted this week. The children will enjoy driving cars through paint.

Concept: The children will have so much fun building cities with blocks and driving their cars around the town. Our group activity of the week will be sorting transportation vehicles into categories: air, land or sea. The water table will be filled with boats.

Parent Teacher Phone Conferences are Monday and Tuesday Feb 17th and 18th. A note will arrive home with your scheduled time.

Motor: We will have her class crawling through the tunnel. We will have the children kick balls at a target on the door. The children will pretend to be a form of transportation as they pick up and drop off bean bags to their destination.

Wishing Daniel Juby a very Happy Birthday on February 2nd.
